

# LIFE CYCLE OF A PLANT

Connect the words to the pictures and write 1 to 5, from which happens first and which last. Then fill in the gaps.

SEED- SEEDLING- LEAVES-STEM-FLOWER-ROOTS-SPROUT

-Plant the \_\_\_\_\_ in the ground.

-Water it and put it in sunlight.

-After a while a small green \_\_\_\_\_ starts to grow out of the seed.

-The sprout becomes the \_\_\_\_\_ that go deep into the ground.

-Then another \_\_\_\_\_ grows up towards the light and becomes the \_\_\_\_\_ and the \_\_\_\_\_.

-Finally the plant grows a beautiful \_\_\_\_\_.
